ADVICE FOR CLEAN ICE

Keeping the ice clean requires a conscientious effort by all members. Our ice technicians put in many hours in to keep our ice surface as clean as they possibly can, So Let's All do our best to help their efforts.

ENTERING THE BUILDING

Please be conscious of debris you might be binging into the club house and use the boot cleaner upon entering. Do not use any footwear on the ice that has been used outdoors.

ENTERING THE ICE SURFACE AREA

Use the boot cleaner and sticky mat every time you enter the ice area. Routinely inspect your gripper for dirt and rubber build up. Several times a year take your gripper and gripper shoe home and scrub them with soapy water. Old grippers will start to deteriorate and begin to fall apart, leaving bits of rubber on the ice. Please replace your gripper at this point.
Also be in the habit of cleaning your broom before and during a game over the garbage cans provided. A couple of times throughout the season, the broom should be cleaned with a brush and soapy water.

WHAT NOT TO WEAR

Many curlers may not be aware of this, but fleece sweaters and pants are not appropriate. Little balls of fluff come off the material and end up on the ice.

BE NICE TO YOUR ICE

Leaving your hands, fingers or knees on the ice for any extended period of time will cause problems. Because your body is so warm, this will melt the pebble right off creating a flat spot that will cause the curling stone to pick and you might miss that Winning Shot. Thank You!
